

SHARPLES

Steady Blankers and Strippers

Creative.
Intricate.
Exceptional.

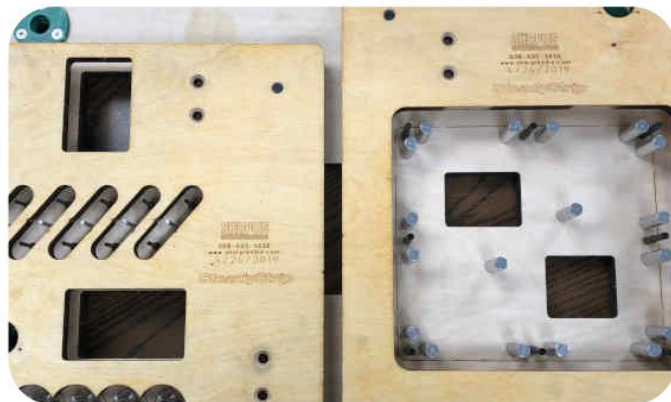

Holding down the sheet during the blanking process is key. If a sheet has narrow sides of scrap; a standard straight hold-down bar may not be enough to hold the entire scrap down while the blanking process is done on today's high speed blankers. When you have a double cut layout Sharples Steady Blanker will assist with holding the entire web while the upper and lower blankers do their jobs.

- ◆ Same turnaround as standard blankers
- ◆ Great alternative when narrow sheets are used
- ◆ Helps with blanking thinner stock

Stripping with a Steady Stripper is an option when you have some of the following challenges:

- ◆ Large window cutouts
- ◆ Stripping areas concentrated in one area
Helps to hold sheet in place to prevent stripped areas from tearing carton
- ◆ Thin stock

Steady Blankers and Strippers are made upon request at Sharples.
